Introduction

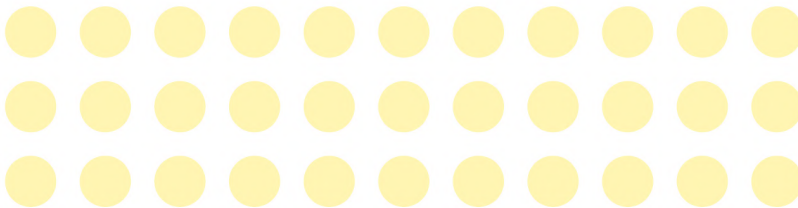

Mykhailo Fedorov

Vice Prime Minister for Innovations,
Development of Education, Science
and Technologies – Minister of Digital
Transformation of Ukraine

Ukraine is a country of creative and talented people, of ideas that come to reality within days, and where the newest technologies are born today. The IT sector has always been one of the key priorities for the Ministry of Digital Transformation. Now it is one of the top priorities for the entire country as it proved to be the most resilient during the full-scale russian invasion.

Today our country is the best test ground for all the newest technologies. We put a special emphasis onto developing defense, tech solutions, that will let our country win and defend our freedom and democracy. Ukrainian startups have gained worldwide popularity, and I invite everyone to invest in Ukraine and join the tech side.

Oleksandr Bornyakov

Deputy Minister of Digital Transformation of Ukraine, Deputy Minister on IT industry development

Each successful startup in our country is more than just a company. It is a sign of how strong, creative, and future-focused we are. Ukrainian startups don't back down from problems. Instead, they see every challenge as a chance to do better. This way of thinking makes our startup environment special.

Our goal is for Ukraine to be a place where good ideas can turn into great innovations that make a big impact around the world. But it is not all about the big wins. It is also about building a strong foundation. This is where we have put together an ecosystem that is built for innovation. We have got the Ukrainian Fund for Innovation Development which helps startups get off the ground. We have got Diia.City which offers a place with good tax conditions and support. We have got a defense-tech cluster which is all about pushing innovation forward.

Ukrainians are coming up with big ideas. Our aim is to make Ukraine a leading European tech hub. By staying focused, together we can build the kind of future we all want to see for our country – innovative and successful.

Introduction

Victoria Tigipko

Head of the Supervisory Board of the Ukrainian Startup Fund, Founder and Managing Partner at TA Ventures

Pavlo Kartashov

Director of the Ukrainian Startup Fund

Today's Ukraine is often described as a country of unprecedented courage and strength, where inventing breakthrough innovations, new approaches to management, and cutting-edge solutions are tested and proved by the wartimes. Since the beginning of full-scale invasion, our technological sector demonstrates unprecedented resilience: keep operating, support clients, deliver value to the users and developing new solutions for the benefit of the whole world.

The Ukrainian tech community improved the ability to move fast, build things, and innovate under fire. Dozens of our tech companies with top-notch products & solutions and global ambitions continue conquering the world: Ajax Systems, Grammarly, Preply, MacPaw, PetCube, People.ai, Reface, and many more.

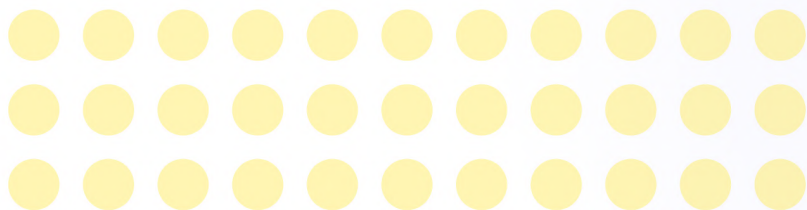

In the Ukrainian Startup Fund, we believe that hard times give birth to strong people and strong people create better times.

Within the conditions of the “perfect storm”, our tech founders became the role models of leaders who build not only unique and powerful international companies but also meaningful innovations for freedom and rebuilding the country of the future: Esper Bionics, A.D.A.M, Delfast, Mosqitter, Let’s Enhance, FarmFleet, etc. The Ukrainian tech industry is the driving force of national tenacity and capacity to move forward despite everything: invent, work, scale, upgrade, produce, fight.

Ukrainian competitive advantage is the ability to mobilize an extraordinary coalition of intelligent, fearless, hardworking, talented people with global mindsets united by the common goal – to win and rebuild Ukraine: entrepreneurs, engineers, volunteers, cyber experts, and all who bring the victory closer via technologies.

Today is the perfect moment to invest in teams and founders from Ukraine – they deserve to be future unicorns: strong, enhanced, productive, inspiring, and promising. Let's discover our "Hall of Fame" and "Rising Stars" together!

Introduction

Oleksandr Yatsenko

Head of Board of Techosystem NGO

Kateryna Hrechko

CEO of Techosystem NGO

It is with great pride and excitement that we welcome you to the inaugural edition of our report "Promising UA Startups: Resilience Edition". As one of the organizers of this remarkable endeavor, we are thrilled to present to you a collection of the brightest, most innovative, and dynamic startups that Ukraine has to offer.

The Ukrainian startup ecosystem has been thriving, and its potential is nothing short of awe-inspiring. From the bustling tech hubs of Kyiv and Lviv to the emerging entrepreneurial scenes in Kharkiv and Odesa, the country has become a hotbed of creativity, ingenuity, and technological prowess.

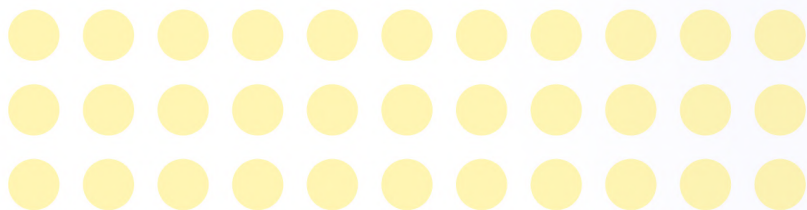

This report is a testament to the remarkable talents and untiring efforts of countless entrepreneurs and visionaries who are shaping the future of industries across the globe.

Our mission in creating this report was clear from the outset: to showcase the remarkable depth and diversity of Ukrainian startups and connect them with investors, partners, and customers worldwide.

Throughout the rigorous curation process, we have diligently sought out the most promising startups representing various sectors, from edtech and agritech to fintech and energytech. Our goal was not only to highlight their groundbreaking ideas but also to make this report a practical resource for potential investors and partners seeking opportunities to unveil. We aimed to present each startup's unique value proposition, their achievements thus far, and their ambitious future plans in a clear and concise manner.

As we launch this report, we embark on a journey of discovery, progress, and mutual growth. We hope that it will serve as a bridge between Ukraine's vibrant startup community and the global stage, attracting attention, investment, and opportunities that will propel these ventures to even greater heights.

About the Report

As a part of work on this project, in order to effectively process and select right startups, it was decided to create a commission of an expert jury whose competencies and knowledge can help identify the most promising startups in two categories.

Startups selection was conducted by invited experts, to participate, including venture capitalists, ecosystem builders, representatives of media and various institutions whose work directly intersects with startups, innovations and is deeply connected to the tech ecosystem.

In this survey, respondents gave their assessment of two categories:

1. Hall of Fame
2. Rising Stars

When evaluating companies for placement in the Hall of Fame, we asked the expert committee to rely on the following criteria:

- raised Series A+ round
- annual turnover 50M+
- valuation over 100M
- internal conviction that the company is a solid role model

In this survey, experts could support the proposed companies for induction into the Hall of Fame without limiting the number of possible candidates.

For the second category, 30 experts analyzed a database of startups in the Rising Stars category to select the top 100 with the greatest potential to become the next Ukrainian unicorns.

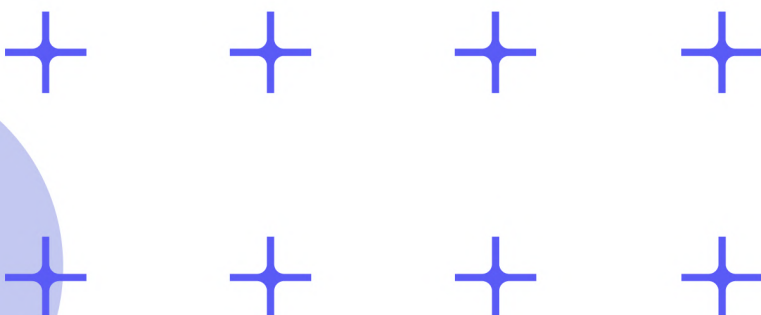

The projects were evaluated based on the following aggregate criteria:

- clear positioning of the startup as a Ukrainian one
- innovativeness
- potential for investment
- track record
- founding date less than 10 years ago

Each expert was to select 35 teams from the shortlist, upon that the general information from all the respondents was collected and compiled into one database and became the basis for our report. It is important to note that experts were kindly informed not to vote for teams they were affiliated to or connected with.

Data provided in the report was updated due to direct communication with startups' teams, including detailed description, year of foundation, stage, work model, industry, location, and number of employees. If the information was not received from startup representatives, details were taken from open sources.

Experts

We would like to express our gratitude to the experts who took part in the survey and supported the initiative with their expertise, time, and dedication to select participants of this report.

About the Ukrainian Startup Fund

The Ukrainian Startup Fund is a leading state institution that drives the development of the startup ecosystem, provides conditions for the growth of the sector, creates a positive investment image of Ukraine's tech industry abroad, and represents Ukrainian innovative solutions around the world.

Established in 2018 by the Cabinet of Ministers of Ukraine at the initiative of the Minister of Finance of Ukraine. On 1 January 2023, it was transferred to the Ministry of Digital Transformation.

Our mission is to make Ukraine a startup nation and a global leader in tech innovation. Our vision is creation of the most powerful platform for interaction in the country's innovation sector, integrated into the international network and holding leading positions in the world due to the quality of national projects that contribute to solving global challenges.

About Techosystem

Techosystem is an open union of the Ukrainian tech ecosystem stakeholders with a focus on product companies, initiated by Sigma Software, Genesis, BRISE Capital, Ukrainian Bridge, Center42, Vacuum Deep Tech Acceleration, and the Ministry of Digital Transformation of Ukraine, with support of Qollabe, SMOK Ventures and Techiiia holding. We are here to unite and support, promote tech and Ukraine as an attractive investment destination.

Throughout the rigorous curation process during the report creation, we have diligently sought out the most promising startups representing various sectors, from edtech and agritech to fintech and energytech. Our goal was not only to highlight their groundbreaking ideas but also to make this report a practical resource for potential investors and partners seeking opportunities to unveil. We aimed to present each startup's unique value proposition, their achievements thus far, and their ambitious future plans in a clear and concise manner.

Techosystem is committed to empowering its community members with valuable resources and connections, paving the way for their growth and success on the global stage.
